HUNTME OSINT — VEHICLE INTELLIGENCE DOSSIER

Generated: 8/5/2026, 6:12:11 PM

Target Plate: RJ27TA1877

Model: TOYOTA KIRLOSKAR MOTOR PVT LTD

Owner Name:	K*****H J**N	**Vehicle Class:**	MAXI CAB(LPV)
Fuel Type:	DIESEL	**Reg Date:**	22-Jan-2009
Insurance Expiry:	01-Mar-2022	**Registered RTO:**	UDAIPUR RTO, RAJASTHAN
Registered Address:	Sukher Road Ayad Rural, Udaipur, Rajasthan 313001		

AI Owner Name Pattern & Top 10 Predictions

Stage 1 analysis indicates the first name starts with K, ends with H, and is 7 characters long, while the last name starts with J, ends with N, and is 4 characters long.

Stage 2 analysis reveals fixed sections in both the first and last names, with variable positions in between. The regional demographic correlation for Udaipur, Rajasthan, suggests a higher likelihood of names common in the area.

Stage 3 probability estimation involves calculating relative likelihoods for valid Indian names matching the exact character constraints.

Here are the ranked predictions:

Rank 1
Prediction: KALPESH JAIN
Estimated Probability: 20%
Reasoning: KALPESH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JAIN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is common in the Udaipur region.
Confidence: High

Rank 2
Prediction: KAMLESH JAIN
Estimated Probability: 18%
Reasoning: KAMLESH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JAIN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is also common in the Udaipur region.
Confidence: High

Rank 3
Prediction: KAILASH JAIN
Estimated Probability: 15%
Reasoning: KAILASH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JAIN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is found in the regional demographic data.
Confidence: Medium

Rank 4
Prediction: KHIRESH JAIN
Estimated Probability: 12%
Reasoning: KHIRESH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JAIN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is less common but still possible in the Udaipur region.

Confidence: Medium

Rank 5
Prediction: KALPESH JOHN
Estimated Probability: 8%
Reasoning: KALPESH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JOHN matches the last name pattern, starting with J and ending with N, and is 4 characters long. Although less common, this combination is still possible.
Confidence: Medium

Rank 6
Prediction: KAMLESH JOHN
Estimated Probability: 6%
Reasoning: KAMLESH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JOHN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is less common in the regional demographic data.
Confidence: Low

Rank 7
Prediction: KAILASH JOHN
Estimated Probability: 4%
Reasoning: KAILASH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JOHN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is less likely due to the lower frequency of the last name JOHN in the region.
Confidence: Low

Rank 8
Prediction: KHIRESH JOHN
Estimated Probability: 3%
Reasoning: KHIRESH matches the first name pattern, starting with K and ending with H, and is 7 characters long. JOHN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is less common and less likely.
Confidence: Low

Rank 9
Prediction: KIRANJH JAIN
Estimated Probability: 2%
Reasoning: KIRANJH is not a common name but matches the first name pattern, starting with K and ending with H, and is 7 characters long. JAIN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is unlikely due to the uncommon first name.
Confidence: Low

Rank 10
Prediction: KESHAVH JAIN
Estimated Probability: 1%
Reasoning: KESHAVH is not a common name but matches the first name pattern, starting with K and ending with H, and is 7 characters long, although it is less common. JAIN matches the last name pattern, starting with J and ending with N, and is 4 characters long. This combination is unlikely due to the uncommon first name.
Confidence: Low

AI Vehicle Intelligence Report

1. Vehicle Identity & Forensic Profile
- The registration number RJ27TA1877 can be decoded as follows: RJ indicates the state of Rajasthan, 27 is the RTO code for Udaipur, and TA is a series block allocated for tourist/taxi/transport vehicles, suggesting this vehicle was registered for commercial use.
- With high confidence (>90%), the vehicle is inferred to be a Toyota Innova 1st generation (2004-2011), given the dominant presence of this model in the maxi cab segment during the registration year.
- The precise age of the vehicle as of today (assuming the current date is August 5, 2026) would be 17 years and approximately 7 months, considering it was registered on January 22, 2009.
- The likely use case for this vehicle, given its classification as a maxi cab (LPV), diesel fuel type, and registration in Udaipur, is as a

tourist cab or for hotel transfers, operating on routes such as Udaipur to Chittorgarh, Mount Abu, or airport transfers, due to Udaipur's tourism economy.
- The current scrap/resale value of the vehicle is estimated to be between ¹2-4 lakh, heavil
use.

2. Owner Intelligence & Identity Reconstruction
- The owner's name pattern, K*H JN, suggests a possible regional origin from Rajasthan or a neighboring state, with a community background that could be inferred as belonging to a local or traditional family, possibly involved in small-scale entrepreneurship or family-run businesses.
- Cross-correlating the owner's details with the vehicle and location (diesel maxi cab LPV in Udaipur, Sukher Road/Ayad Rural) suggests a profile of a local taxi operator or a small fleet owner catering to tourist demands, possibly with a family transport business background.
- Sukher Road/Ayad Rural indicates the owner might have a lower to middle socioeconomic standing, with an occupation likely related to transportation or tourism services, given the area's mixed semi-urban/rural profile and proximity to tourist routes.
- The behavioral profile of the owner, allowing insurance to lapse for 4 years, suggests financial distress or a decision to cease commercial operations, possibly due to the vehicle's age and maintenance costs, with a high probability that the vehicle is either scrapped, sold informally, or abandoned.

3. Insurance Lapse Investigation
- The insurance lapse on 01-Mar-2022 (1618 days ago) indicates a significant period of non-compliance, suggesting the vehicle is most likely not operational legally.
- The vehicle's current operational status is inferred to be inactive or operating illegally, given the lapse in insurance, which also invalidates the fitness certificate and route permit under the Motor Vehicles Act.
- Legal consequences include penalties under Section 196 of the Motor Vehicles Act for dri
the first offense and ¹4,000 for subsequent offenses, along with the risk of vehicle seizure
- The insurance lapse has a cascading effect, invalidating the fitness certificate and route permit, which are essential for commercial vehicle operation, thereby grounding the vehicle legally.

4. Geographic Intelligence — Udaipur & RTO-27
- Udaipur's economy, heavily reliant on tourism, suggests that LPVs like the Toyota Innova are crucial for transporting tourists to and from the city's numerous attractions, such as the City Palace, Lake Pichola, and the nearby destinations of Chittorgarh and Mount Abu.
- The Sukher Road/Ayad area, with its mix of semi-urban and rural settings, hosts auto workshops, small-scale industries, and residential areas, indicating a vibrant local economy with a need for transportation services.
- Proximity to NH8 and the Udaipur airport, along with the area's access to the Ayad River basin, suggests operational convenience for tourist transport services.

5. Google Dork Reconnaissance
1. `"RJ27TA1877" site:olx.in`
2. `"RJ27TA1877" site:cardekho.com`
3. `"RJ27TA1877" site:facebook.com`
4. `"RJ27TA1877" site:courts.ecourts.gov.in`
5. `"RJ27TA1877" site:indiamart.com`
6. `"RJ27TA1877" site:justdial.com`
7. `"RJ27TA1877" site:vahan.parivahan.gov.in`
8. `"RJ27TA1877" site:udaipurtimes.com`
9. `"RJ27TA1877" site:rajasthan.gov.in`
10. `"RJ27TA1877" site:police.rajasthan.gov.in`

6. Digital Footprint & Platform Assessment
- OLX/Quikr: HIGH - Likely platforms for vehicle resale or parts.
- CarDekho/CarWale: MEDIUM - Possible listings for vehicle sales or comparisons.
- Facebook Marketplace: LOW - Less likely for commercial vehicle sales.
- JustDial: HIGH - Relevant for taxi services or vehicle-related businesses.
- IndiaMART: MEDIUM - Could be used for parts or services related to the vehicle.
- court.ecourts.gov.in: LOW - Unlikely for vehicle-related cases unless involved in legal disputes.
- Udaipur local news: LOW - Unless the vehicle or owner is involved in a newsworthy event.
- Parivahan VAHAN portal: HIGH - Official platform for vehicle registration and related services.

7. Risk Matrix
- Insurance: CRITICAL - Lapsed for an extended period.
- Roadworthiness: HIGH - 17-year-old diesel commercial vehicle.
- Clone plate risk: MEDIUM - Possible but less likely given the vehicle's age and commercial use.
- Owner identity confidence: 6/10 - Inferred from name pattern and location.
- Investigation priority: HIGH - Due to insurance lapse and potential illegal operation.
- Overall data confidence: 7/10 - Based on available data and inferences.

8. Intelligence Gaps & Next Steps
- Missing data points include the current physical location of the vehicle, the owner's contact information, and any recent transactions or legal cases involving the vehicle.
- Ranked investigation steps:
1. Check the Parivahan VAHAN portal for any updates on the vehicle's registration status.
2. Use the mParivahan app to scan the vehicle's QR code for details.
3. Search ecourts.gov.in for any legal cases involving the vehicle or owner.
4. Contact JustDial for listings of taxi services in Udaipur that might be related to the vehicle.
5. Search IndiaMART for any transport services or vehicle parts businesses related to the owner or vehicle.
6. Visit the Udaipur RTO office for physical verification of records and to inquire about the vehicle's status.
